Attention

The **MARINER LED** Lifebuoy-Light has to be stored in upside down position (cap downwards, see Fig. 2). The activation is done automatically by floating in water through upright position (Fig. 3).

Function

The MARINER LED Lifebuoy-Light is specifically developed to be used in combination with a lifebuoy during twilight / darkness. After the device is thrown overboard into the water, it activates automatically.

Warranty

If the **MARINER LED** Lifebuoy-Light is used properly; we grant a 36-months warranty on all components.
