CUTTING AREA

IT - NOTE:

Assicurarsi della perfetta coincidenza/planarità tra la base del verricello e la coperta prima di fissarla con i dadi.

Rimuovere il materiale in accesso dal foro di passaggio della catena/cima, rifinirlo e lisciarlo con un prodotto specifico (vernice marittima, gel o resina epossidica) assicurandosi il libero passaggio della catena/cima.

EN - NOTES:

Make sure of the perfect flatness between the winch base and the deck before fixing it with the nuts.

Remove excess material from the chain passage, refine and flatten with a specialized product (marine paint, gel coat or two pack epoxy) to assure free passage for both rope and chain.
