## DATASHEET

# MOB RESCUE SYSTEM

The MOB RESCUE SYSTEM from SKYLOTEC is an essential safety solution for anyone

operating on the water. Designed for quick and secure use in man-overboard situations, it enables the crew to reach, secure, and safely recover a person who has fallen overboard. The system includes a floating 45-meter rescue line made of durable polypropylene with a breaking strength of 600 kg, a bright orange buoyant rescue loop, and a compact storage bag that can be permanently mounted on the railing. A clear instruction label on the bag explains immediate use in an emergency.

The MOB RESCUE SYSTEM is manufactured 100% in the EU and in SKYLOTEC's own production facilities – ensuring maximum quality, reliability, and safety when every second counts.
