# Wichard

ProLine

Tethers
ISO 12401:2009

When it comes to safety, compromise is not an option. That is why Wichard has developed a new generation of tethers to ensure maximum safety and ease of use thanks to some innovative new features.

NO COMPROMISE!

+ benefits
▸ 4 models available
▸ Compliance with ISO 12401:2009 and ISAF regulations (OSR)
▸ Overload indicator with shock absorber on all models

> Maximum safety
• ErgoLockSystem (patented): automatically closes and locks the snap hook
• Locking indicator
• Retro-reflective webbing, visible at night
• Overload indicator (as per ISAF offshore special regulations)

> Uniquely easy to use
• Easy opening snap hook
• V-Nose (patented): special tip makes hooking and unhooking easy with one hand
• Wide opening snap hook (26 mm)
• One of the most compact and light tethers on the market

Part # 7034

Part # 7032

Exclusive feature: SmartLoop

Product can adapt to suit all needs and users.
SmartLoop lets you:
• turn a single webbing tether into a double webbing tether (see fig. A)
• turn a double webbing tether into two single webbing tethers (see fig. B)

Exclusive feature: EcoLogic

Removable snap hook lets you increase the lifespan of the product by replacing the webbing only.
Our exclusive EcoLogic feature makes ProLine a budget-friendly range!

INFORMATION ABOUT THE ISO 12401:2009 STANDARD

For the amateur sailor safety, the standard demands:
• Self-locking carbine hooks
• A possible unhooking from the harness side (for people above 50Kgs)
• An impossible unhooking from the harness side for people below 50Kgs (children)

Choose your tether (as per ISO 12401:2009)	> 50 Kg	≤ 50 Kg	≤ 50 Kg

7032	x	√	√
7033	x	√	√
7034	√	√	x

Special materials for less weight and greater performance

Wichard carefully selects materials (aluminium, carbon fibre, etc.)
> ProSnap snap hooks are forged in special aluminium to ensure excellent rustproof qualities and minimum weight.
> ProLine webbings are designed with materials that absorb very little water and dry quickly.
