

MARINE HEATERS

Air Heaters

SPARTAN

4.5 kW | Diesel Heater

Power:	1400-4500 W (4,700-15,300 BTU)
Fuel:	Diesel, HVO
Operating Voltage:	12 V
Fuel Consumption:	0,16-0,46 l/t (5.4-15.5 oz/h)
Electricity Consumption:	0.7-4.5 A
Air Volume at Min Heat:	102 m³/t (60 cfm)
Air Volume at Max Heat:	227 m³/t (133 cfm)
Weight:	15 kg

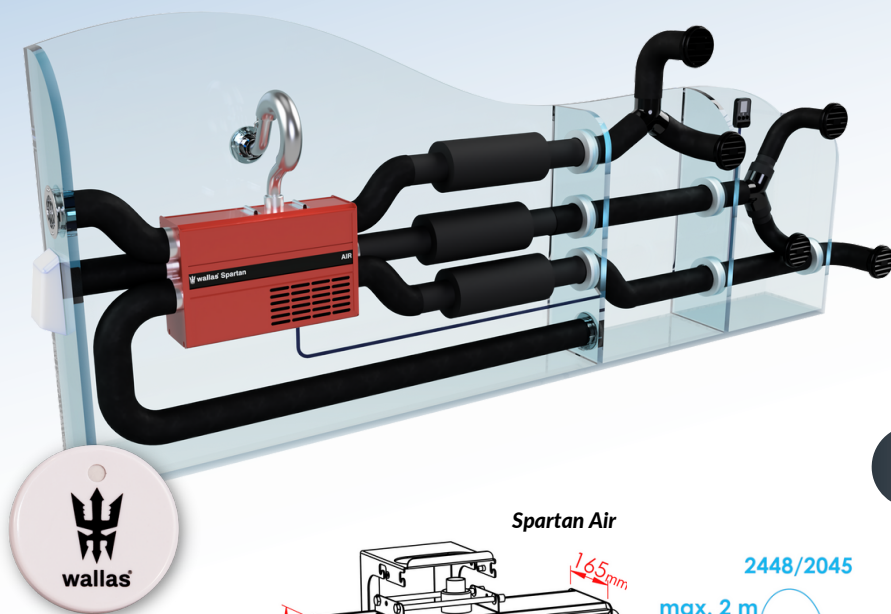

As one of the most powerful Wallas models, the Wallas Spartan offers the most advanced control features in the marine heater market, maximizing convenience and versatility. The Advanced Control Panel can be accessed remotely by Wallas mobile app, which enables you to turn the heater on from anywhere. The wireless sensor monitors the indoor temperature with high accuracy, maintaining smooth temperature stability for maximum comfort. When narrowing down your options, note that **Spartan Twin** has two makeup air inlets and two warm air outlets. In comparison, the **Spartan Air** has three inlets and outlets for increased airflow and efficiency. Several fresh air hoses produce cleaner and fresher air indoors and improve efficiency. In addition to fossil diesel, the Wallas Greenboost burner burns renewable diesel (HVO) cleanly and energy-efficiently, resulting in very low NOx and CO₂ values.

3008 ADVANCED

Thermo | Intelligent Control Panel

- Use heater in **Thermo Mode** to hold a target room temperature.
- Switch to **Manual Mode** to deliver heat at six power levels.
- Blow fresh air without heating in **Ventilation Mode**.
- **Air Boost Mode** provides superior ventilation volume for extremely fast defrosting and drying - The highest in its class!

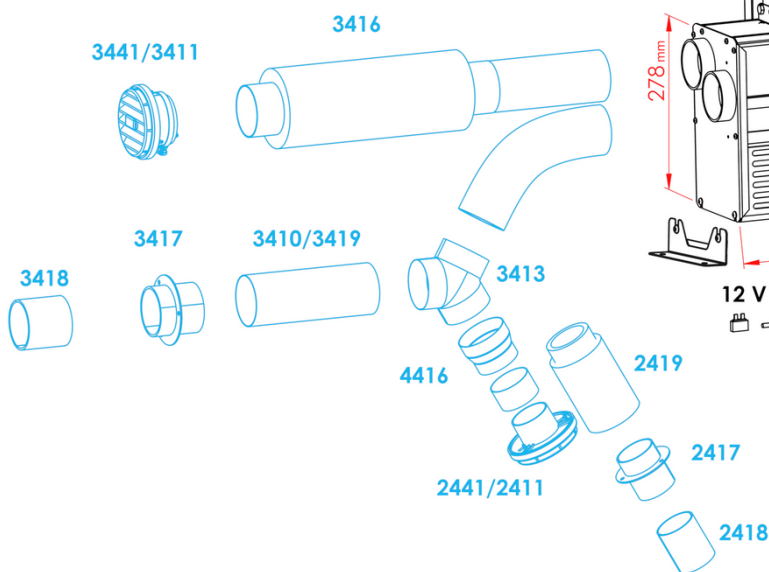

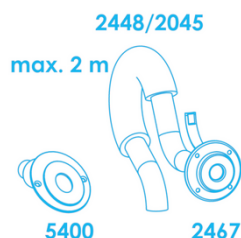

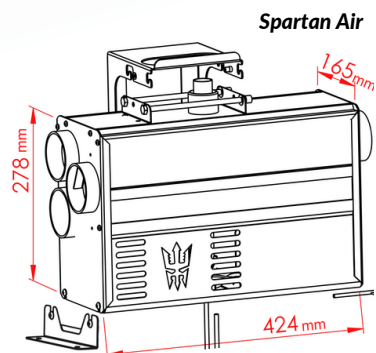

Multiple inlets take fresh air from outside and heated return air from the cabin. This improves efficiency and ensures oxygen rich air in the cabin.

Multiple outlets reduce air drag and keep the sound level low.

INSTALLATION

Easy installation can be done independently or by a Wallas professional.

Wireless temperature sensor monitors cabin temperature with improved accuracy and flexibility.

FEATURES

- Multipoint remote temperature sensing for improved accuracy.
- Multiple inlets and outlets allow greater installation flexibility and drying performance.
- Superior ventilation volume in Air Boost mode.
- Warranty 2+1 years.
- Variable output eliminates system cycling and reduces noise, keeping you comfortable.
- Brushless blower motors have a very long life-cycle, supporting reliably long service intervals.
- Fully enclosed laminar burning process ensures a quiet sound level and wind resistant burn.
- Low temperature on unit and exhaust pipe increases safety.
- Made of stainless steel, high-grade aluminum, and other corrosion-resistant materials.
- Drawing fuel directly from the main tank of the vessel saves space and eliminates the need for a separate tank.
- E-mark approved for vehicles.

Recommended Builds

Boats: 9-12 m (29-40 ft)

Camper Vans: MB Sprinter

Trailers, Containers: up to 8 m (26 ft)

Accessories in black come with the standard package. Accessories in blue are additional/optional.
